## CORAVIN SELECTION BY THE GLASS WHITE AND RED

*The coravin system uses a technology that keeps the cork in the bottle where it has been since the bottle was sealed. A stainless-steel contraption looking not unlike a small microscope incorporating long needle which is inserted through the cork and through that is extracted as much wine as you like filling the empty space with argon gas from a little cylinder inside the device. When the needle is extracted, the springy cork reseals itself and the only trace that remains is a little pinprick in the cork. Here in HQ we selected some of the best wines in the world to pour by the glass, we hope you enjoy them as much as we enjoyed selecting them.*

### *WHITES*

#### *FRANCE*
